Mail Stream Productivity Made Simple

SECAP
Mail Stream Management and Solutions...

Power To Communicate With Your Customer

With the advanced Secap® SI 4200 / SI 4400 Inserting Systems you can reach each of your present customers, and target new customers, with an increased level of efficiency and productivity. They are flexible systems that excel in target marketing and direct mail, as well as advanced invoicing and informational mailings.

Secap's Inserting Systems will improve the speed, accuracy and efficiency of processing your outgoing mail. Now you can cut costs without sacrificing dependability or accuracy plus, leverage the capabilities of our integrated systems to bring in new business.

Bring High Productivity To Your Daily Applications

Regardless of the business you are in, the kinds of mailings you do are probably very similar. Your repetitive mailings need to accomplish one of four objectives:

- **Manage or transmit your financial documents** – bills, statements, purchase orders and checks.
- **Request a transaction** – direct marketing letters or donation requests.
- **Convey information** – newsletters and announcements.
- **Communicate within your own organization** – benefit statements, announcements or paychecks.

The Advanced Solution For Folding, Inserting, Mail Piece Integrity, and Work Flow Efficiency

Sheet Feeders
Up to 4 sheet feeders, each with a 325 piece capacity.
Feed easily and reliably for continuous operation.
Accumulate (up to 5) multiple pages together (before folding) for a professional looking multi-page document instead of loose individually folded sheets.

Daily Mail Feeder
Quick processing of stapled and non-stapled sets.
Simply drop the piece into the dedicated tray.

Advanced LCD Control Panel That's Easy to Use!

Next Generation User Interface
Icon driven menus, pictures and instructions give operator step by step instructions for unprecedented ease of use and a flawless operation.
Create and modify jobs and easily switch between applications with just the right amount of assistance.
Maximize productivity with SwiftStart™ functionality that detects envelopes and document sizes automatically.

Insert Feeder(s)
Up to 2 insert feeders - each with a 300 piece capacity.
Loads easily with convenient access.
Reloading with no downtime.

Power Stacker, optional
Vertical design allows easy loading and unloading even while running to maximize productivity.
Neatly stacks mail in sort sequence for postal automation savings.

High Capacity Envelope Feeder
Easily accepts up to 300 envelopes and moves them into ready position.
Less time reloading provides more continuous operation for greater productivity.

Continuous Feed
This option allows pages from a second, third or fourth feeder to continue feeding, without interruption.

Ergonomically Designed Work Table
Adjustable to match each user's height requirements for optimum working conditions.
Extra surface area for working materials.

OMR, optional
Optically scans and reads OMR marks and interprets specific processing instructions for each mail piece.
Helps ensure accuracy and mail piece integrity.
Supports all basic and advanced tabletop inserter OMR.

Setting New Standards In Mail Productivity

The new Secap® SI 4200 / SI 4400 Inserting Systems raise the performance bar for mid-size mailers to a new level. For speed, accuracy, reliability and ease-of-use in a small footprint, the SI 4200 / SI 4400 can help.

- Increase your revenue by optimizing your mailings.
- Add promotional pieces with ease to boost effectiveness and flexibility.
- Easy-to-do mailings can be done more often.
- Operate more efficiently by improving your process.
- Ergonomic output devices streamline your operation.
- Controlling your own mail process puts you in charge of your own schedule and priorities.
- Selective insert capability saves time and money.
- Reduce costs by using your staff resources efficiently.
- Easy set up — virtually anyone can run a mailing.

In business today, there's no time for down time. You need equipment that can handle a wide variety of jobs effectively, without additional staff burden. The SI 4200 / SI 4400 are designed to manage your document folding and inserting today, and will grow as your requirements expand tomorrow.

"We don't worry about mail-and mailings anymore. The SI 4400 inserter lets us put our focus on our business."
